"PEERAGOGY MONTHLY WRAP" WORKING GROUP MEETING WRAP: 2020-05-27

- How does it make sense for everyone to have their own corona research?

- How can we hope to cure cancer? We don't have tools.

- Actionism – what happens when people lose interest following an initial excitement about a project?

- Writing up patterns is nice, but how are we using them? What software is using/supporting/implementing them?

Common to create solutions or software but then not openly licensed or behind a pay wall – may provide some advantages to the founders, but how can that help wider community? Is that a bad thing that interest of owners or founders diverge from community? Good thing? Inevitable? What are other approaches?

Made me think of this paper on modular politics: HTTPS://DOCS.GOOGLE.COM/DOCUMENT/D/1C4VP4HQFYHNSFZM4RNO2UH4I
